CONTACT-FREE
NETWORK INSTALLATION

ByteSpeed®
Your Complete IT Resource

SAVE MONEY WITH CONTACT-FREE NETWORK INSTALLATIONS.

ByteSpeed's networking gear comes preconfigured and clearly labeled for easy installation and project deployment. Most contact-free network installations cost 40% less than traditional network installations.

With ByteSpeed's contact-free network installation, we remotely configure and label each switch with your configuration, and label all boxes so you can do your own physical installation of pre-configured switches. Our experienced networking team is available Monday thru Friday 8am-5pm CST to offer tech support via phone, email, or remote assistance.

ByteSpeed's contact-free network installation service is available with a purchase of Ruckus wireless access points and switches, as well as Juniper/Mist wireless and switches.

Contact us with questions or to request a free consultation with a ByteSpeed Sales Engineer: *sales@bytespeed.com -or- 877.553.0777.*

PREVENT THE SPREAD OF COVID-19

ByteSpeed offers contact-free network installation to prevent unnecessary traffic from outside your school district or business.
